
MDI ACHIEVE LAUNCHES NEW WEBSITE

May 19, 2008 — MDI Achieve is pleased announce the launch of our new website, www.MDIAchieve.com.

This new website is designed to provide complete information on MDI Achieve's broad and comprehensive suite of software solutions. Descriptions of each module, along with printable brochures, system requirements, downloadable demonstrations, and client testimonials are included to help eldercare providers learn how MDI Achieve's fully-integrated software products can help improve quality of care, maximize reimbursements and streamline day-to-day operations.

“Our new website is a wonderful presentation of how all of the various products in the MDI Achieve family fit together to make one powerful system” explains Jason Menges, Vice President of Business Development. “With all of the changes that have occurred with our organization recently, we want the eldercare industry to understand exactly who MDI Achieve is and what we have to offer. This website does just that,” he continued.

About MDI Achieve

MDI Achieve is the leading provider of software to the eldercare industry, serving more than 7,500 clients. With a broad product line of effective, easy-to-use solutions, MDI Achieve software provides the features and functions eldercare organizations need to manage the day-to-day operations more efficiently. MDI Achieve has offices in St. Louis, Minneapolis, Smithfield, Tampa and Dallas.
