

Matrix Workstation Configuration – EE Addendum

Software Prerequisites for Workstations Utilizing Enterprise Edition

Before you can begin working with cubes in EE, you will need to download and install the required components from Microsoft. Please keep in mind that MDI Achieve does not provide support for the installation of Microsoft products and that Microsoft may change these products without notice.

Download and install the following software packages on the Matrix EE workstation. Please note that these are *free* downloads from Microsoft's website:

- Microsoft .NET Framework Version 2.0 Redistributable Package (x86)
- MSXML 6.0 Parser (x86) – *download the msxml6.msi file*
- Microsoft SQL Server 2000 PivotTable Services (x86)
- Microsoft SQL Server 2005 Analysis Provider Services 9.0 OLEDB Provider (x86)

Note: *All packages that you download from Microsoft must be x86 install packages.*
