

Clinical Applications Solutions

Assessments Features

The MDS 2.0 assessment is the key component of the Assessment section of the Clinical Application module. ULTRACare provides for the entry of all required MDS forms and maintains a complete on line history. Each assessment is evaluated and automatically produces the Resident Assessment Protocol Trigger Legend and Summary. Case mix, RUGs, and full detailed reporting is supported to provide staff with all the resources they need to properly manage the assessment and submission schedule.

- Comprehensive MDS related reporting
- CMS 672 and 802 forms and analysis reports
- Facility QI profiles
- Export of MDS answer detail to Microsoft Excel
- Nursing Time Requirements
- Assessments due by date and type
- MDS Query to search for selected answers by resident
- ADL Status and Condition statistics
- Swing Bed MDS
- Consistent, “by the rules” logic throughout for reliable use
- Interfaces with Resource Care Tracker®
