

REPS Leads System Requirements

Updated 12 May 2011

REPS Suite RSU12

Note: The operating system and SQL Server will need to be licensed appropriately according to Microsoft specifications.

Server Configuration for up to 10 Communities

Minimum Requirements

Database	Microsoft SQL 2005 Standard or Enterprise Edition
Operating System	Windows 2003 Server Standard , Enterprise or Datacenter (with latest service packs)
Processor	Pentium 4 processor (or higher) 2.4GhZ (or higher) single-core 1.8GHz dual-core single processor Note: Multiple processors are recommended
Memory	Minimum of 4 GB RAM Note: Configuration is necessary for over 2GB RAM SQL Server 2005 Standard can be <u>configured</u> to use up to 4GB of RAM SQL Server 2005 Enterprise can be <u>configured</u> to use up to 64 GB of RAM
Hard Disk	60+ GB hard disk space (or more based on the size of your database) Note: A separate hard drive for transaction logs allows for better performance
Software	Internet Explorer 7.0 + (with latest service pack) Internet Information Service (IIS) with SMTP installed Microsoft Office 2000 (or higher)
Other	Printer for reports (or printer driver to preview reports) Network and connection with TCP/IP network protocol Tape backup device Backup device Uninterruptible Power Supply (UPS)

Server Configuration for 10 or More Communities

Minimum Requirements

Database	Microsoft SQL 2005 Standard or Enterprise Edition
Operating System	Windows 2003 Server Standard , Enterprise or Datacenter (with latest service packs) <i>Note: Enterprise edition is strongly recommended due to scalability</i>
Processor	Pentium 4 processor (or higher) 2.4GhZ (or higher) single-core 1.8GHz dual-core single processor <i>Note: Multiple processors are strongly recommended</i>
Memory	Minimum of 4 GB RAM <i>Note: Configuration is necessary for over 2GB RAM</i> SQL Server 2005 Standard can be configured to use up to 4GB of RAM SQL Server 2005 Enterprise can be configured to use up to 64 GB of RAM More than 4 GB of RAM may be necessary based on the volume of transactions and reports being processed. Windows Server 2003 Enterprise or Datacenter edition is required to utilize more than 4 GB of RAM.
Hard Disk	60+ GB hard disk space (or more based on the size of your database) <i>Note: A separate hard drive for transaction logs allows for better performance</i>
Software	Internet Explorer 7.0 + (with latest service pack) Internet Information Service (IIS) with SMTP installed Microsoft Office 2000 (or higher)
Other	Printer for reports (or printer driver to preview reports) Network and connection with TCP/IP network protocol Tape backup device Backup device Uninterruptible Power Supply (UPS)

Workstation Configuration

Minimum Requirements

Operating System	Windows Operating System (2000 or higher)
Memory	Minimum of 512 MB of RAM
Software	Internet Explorer 7.0 +(with latest service pack) Microsoft Office 2000 or higher
Other	Printer for reports (or printer driver to preview reports) Must be fully-functional workstations
